

Use of Logical Puzzles to Promote Techeracy for Non-Science/ Engineering Students

Techeracy

Numeracy

Literacy

Behrooz Parhami
University of California,
Santa Barbara

About This Presentation

This slide show was first developed in winter of 2018 for a seminar presented to Razi University, Kermanshah, Iran. The talk was delivered in Persian via Skype, on Monday, 3/05, 9:30 AM, at the Central Library's Dr. Shamsipour Hall. A revised form of the talk was given in November 2018 at IEEE IEMCON, U. British Columbia, Vancouver, Canada. All rights reserved for the author. ©2018 Behrooz Parhami

Edition	Released	Revised	Revised	Revised
First	Winter 2018	Fall 2018		

Literacy, Numeracy, Techeracy

Literacy: Deemed necessary since the Middle Ages
Reading & writing skills (taught by telling stories) → **Literate**

Prose literacy

Document literacy

And now ... **Digital-media literacy**

Numeracy: Quantitative literacy

Arithmetic skills (taught via real-life problems) → **Numerate**

Expanded to include problem-solving and reasoning

Techeracy: Technical (engineering) literacy

Appreciation of technology (taught via ... ?) → **Techerate**

Thesis: ***Techeracy should be taught via puzzles***

A Brief History of Techeracy

Earliest discussion: 18th-century Industrial Revolution

In modern times: Before World War II

Became urgent: In our lifetime, that is, the age of

Digital computing

Quantitative finance

AI: Smart everything ...

My background in promoting techeracy:

1984 computer appreciation book (in Persian)

2003 “Math + Fun” extracurricular program

2007 CE puzzling problems seminar

2016 sci/tech puzzling problems

Behrooz Parhami's INT 94TN Course Page for Fall 2016

Puzzling Problems in Science and Technology

Page last updated on 2016 December 02

Note: This is a new freshman seminar, first offered in fall 2016

Enrollment code: 58446

Prerequisite: Open to freshmen only

Class meetings: W 3:30-4:20, Buchanan 1934

Instructor: Professor Behrooz Parhami

Open office hours: M 12:00-2:00, W 4:30-5:30, HFH 5155

Course announcements: Listed in reverse chronological order

Grading scheme: Pass/Fail grade assigned based on attendance

Course calendar: Schedule of lectures and links to lecture slides

The ten lectures: Lecture summaries and references

Additional topics: Possible replacements for current lectures

Attendance record: Please check regularly for possible errors

Miscellaneous information: Motivation, catalog entry, history
[The design and goals of this seminar resemble those of ECE 1B, "Ten Puzzling Problems in Computer Engineering."]

Course Announcements

2016/12/02: The fall 2016 offering of the freshman seminar INT 94TN is officially over and course grades have been reported to the Registrar. I enjoyed preparing new material for this seminar, teaching it, and getting to interact with students from several majors not normally taking my ECE Department courses. Have a great holiday break and hope to see some of you in future courses or around the campus!

Example Topic: Predicting the Future

Find the Next Term in a Sequence

	$n = 1$	2	3	4	5	6	7
$u(n) = n$	1	2	3	4	5	—	
	1	2	3	4	5	—	—
	1	2	3	—	5	6	
—	—	3	4	5	6		$c(n) = n + 2$
—	—	2	4	6	8	—	$d(n) = 2n$
	2	4	8	16	—	} $f(n) = 2^n$	
—	—	2	4	8	16		

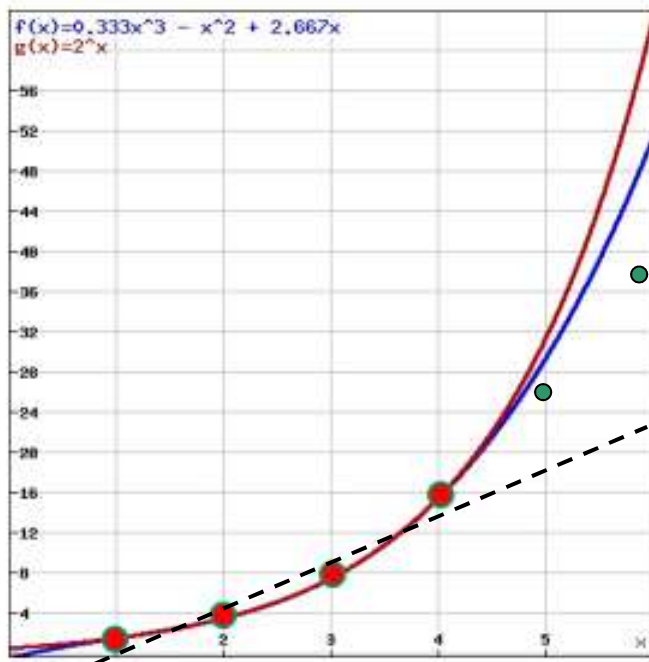

Sequence Puzzles: Let's Dig Deeper

$n = 1$	2	3	4	5
2	4	8	16	<u>32</u>
2	4	8	16	<u>30</u>
2	4	8	16	<u>26</u>

$$f(n) = 2^n$$

$$g(n) = n(n^2 - 3n + 8)/3$$

$$h(n) = n^2 (\pm 1 \text{ for odd } n)$$

What about the 30th term?

$n = 1$	2	...	30
2	4	...	<u>1,073,741,824</u>
2	4	...	<u>8180</u>
2	4	...	<u>900</u>

Sequences Do Not Have to Be Numeric

Z	O	T	T	F	F	—		
J	F	M	—	M	J	J		
31	—	31	30	31	30	31	31	30
A	E	F	H	I	—			
3	3	5	4	4	3	5	—	
3	4	6	9	—	18	24		
1	3/2	—	7/8	9/16				
1	11	21	1211	111221	312211			—

221

111

212

122

—

Economic Forecasting: Stock Market

Long-term variations: Uses logarithmic scale on the value axis

Technology Forecasting: Moore's Law

Transistors per chip

In 1965, Gordon Moore, an Intel co-founder predicted that the number of components per integrated circuits will double every year.

In 1975, he revised his forecast to doubling every 2 years (the original forecast had a small set of data points).

Exponential growth is a hallmark of computing and communications.

Climate Forecasting: Global Warming

Program Forecasting: Branch Prediction

Modern computers look ahead and process future work to increase speed:

When there is a conditional branch, future work to be done is uncertain

```
-----  
-----  
if A > 0  
[if not, skip the then part]  
then  
-----  
-----  
[skip the else part]  
else  
-----  
-----
```

```
-----  
-----  
while A > 0 do  
-----  
-----  
endwhile  
-----  
-----
```

```
-----  
-----  
repeat n times  
-----  
-----  
endrepeat  
-----  
-----
```

Example Topic: Recommender Systems

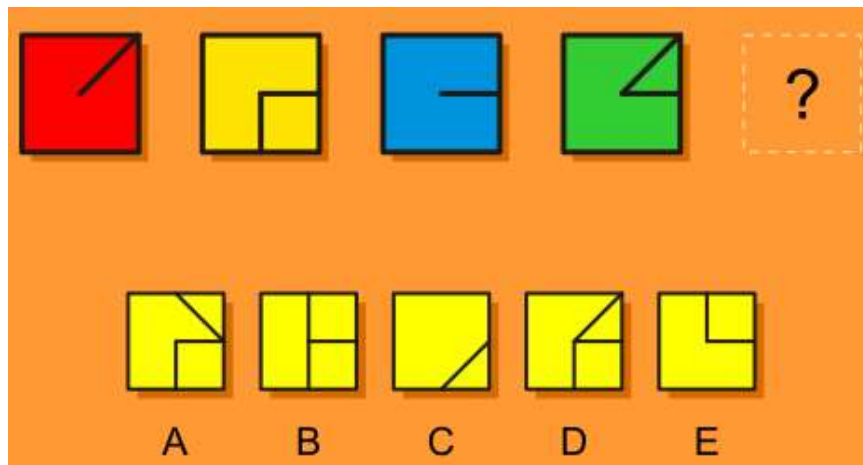

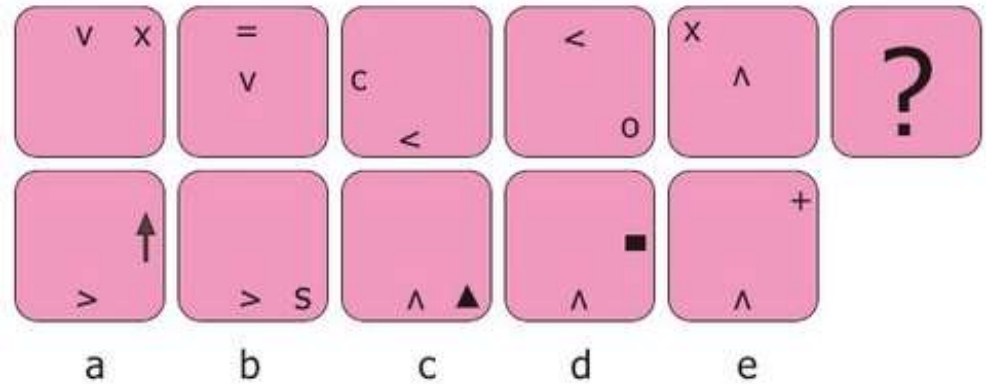

Which of These Is Not Like the Others?

A	H	I	M	N	O	V	W	X
0	3	6	7	8	9			
3	4	7	13	20	33	53	86	139
								
Big	Fast	Green	Warm					

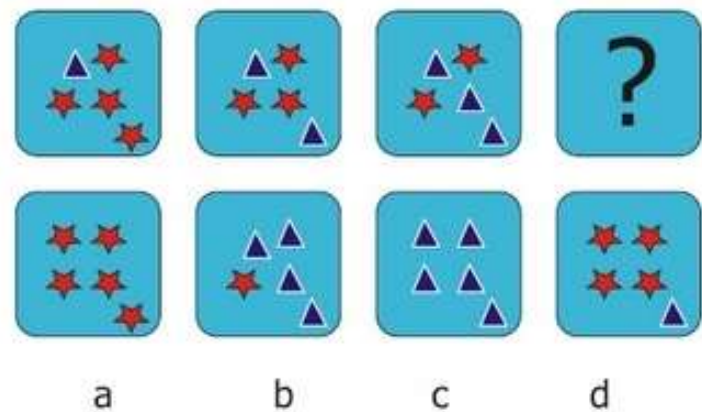

Which of These Is Like the Others (1)?

Which of These Is Like the Others (2)?

Answer figures

Similarity Puzzles with Words

What do the following sets of words have in common?

assess; banana; dresser; grammar; potato; revive; uneven
(besides all having at least two repeating letters)

bulb; orange; angel; silver; month; revive; uneven

baobab; youngberry; hopscotch; yieldability; dachshund;
dumbfounded

aquamarine; beloved; discrepancy; frangipani; freedom;
gallipot; overflowing; pagoda; scrounger

Classifying by Color, Shape, and So on

Very young kids are taught about classification by features
(2-minute video: <http://www.youtube.com/watch?v=5bip0bcFlgo>)

Possible features in the shapes shown in the video:

Color: Blue, Green, Orange, Yellow

Geometric shape: Square, Rectangle, Triangle, Circle, ...

Curvature: Straight sides only, at least one curved side

Size: Large, Small (area)

Number of sides: 2, 3, 4

Triangleness: Yes, No

Thickness?

Material?

Weight?

Floats on water?

Example: Recognizing Five Letters

A, B, C, D, E

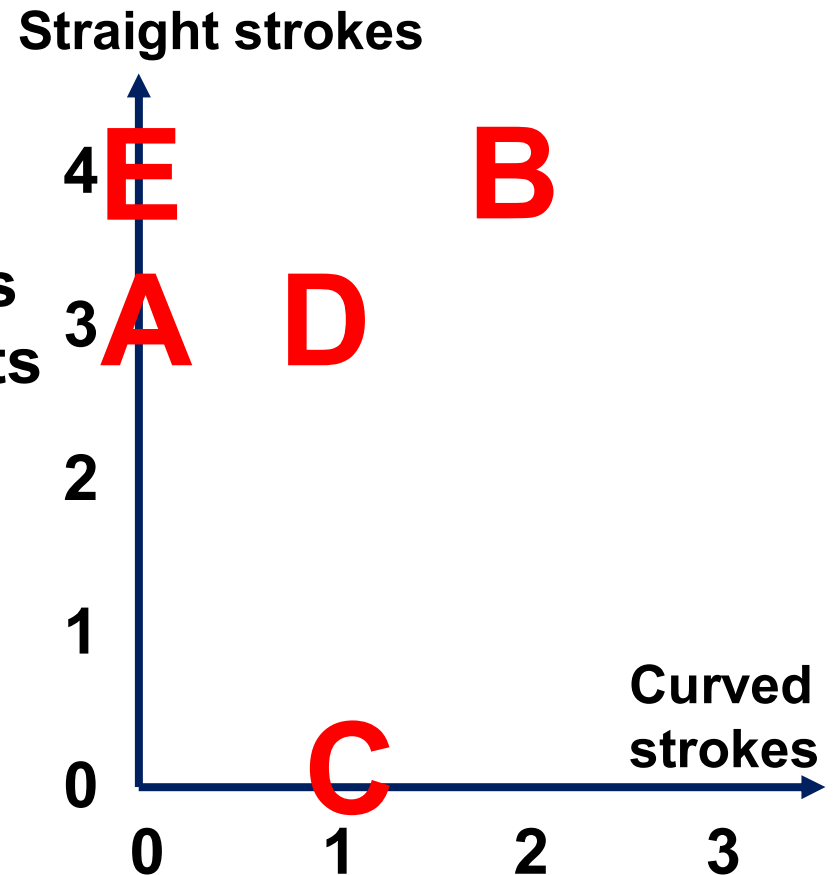

Example features:

x: Number of curved segments

y: Number of straight segments

Where would “F” fall?

Suggest an additional feature

Pattern Classification Example

Extracting features from given inputs allows us to separate and classify the inputs according to desired categories

Google Search Results Presentation

The screenshot shows a Google search for "razi university kermanshah". The search bar contains the text "razi university kermanshah" and a microphone icon. Below the search bar are tabs for "All", "Maps", "News", "Images", "Videos", "More", "Settings", and "Tools". The search results show approximately 81,800 results in 1.00 seconds. The first result is "Scholarly articles for razi university kermanshah" with three sub-entries: "and research forest of Razi University, Kermanshah ... - Heidari - Cited by 12", "Antimicrobial activity of the leaves of Pistacia khinjuk - Taran - Cited by 28", and "In vitro Propagation and Agrobacterium-mediated ... - Motamedi - Cited by 16". The second result is "Razi University - Wikipedia" with the URL "https://en.wikipedia.org/wiki/Razi_University" and a description: "Razi University (Persian: دانشگاه رازی) is a public university based in Kermanshah, Iran. It is a center of research in many STEM fields such as CFD (Computational Fluid Dynamics), membrane research, nano-science, and nanotechnology. The school's Science and Engineering Departments attract many Iranian high ...". The third result is "دانشگاه رازی: صفحه نخست" with the URL "razi.ac.ir/" and a description: "Razi University دانشگاه رازی RAZI UNIVERSITY. کرمانشاه، طاق بستان، خیابان دانشگاه، دانشگاه رازی-کدپستی: ۶۷۱۴۴۱۴۹۷۱. تلفن مرکزی: ۰۸۴-۳۴۲۷۷۶۰۵-۶. info@razi.ac.ir. کلیه حقوق این وب سایت متعلق به دانشگاه رازی می باشد. | هرگونه برداشت مطالب با ذکر منبع بلامانع است. طراحی و پیاده سازی توسط سپهر افزار ایرانیان. آرشیو اخبار - دانشگاه رازی کرمانشاه - University portal - انوماسیون تخصصیه". The fourth result is "Razi University of Kermanshah, Iran - Academia.edu" with the URL "razi.academia.edu/" and a description: "Academia.edu is a place to share and follow research.". The fifth result is "Razi University - Classbase" with the URL "https://www.classbase.com/countries/Iran/Universities/Razi-University-20642" and a description: "Razi University (RU). 5 4 3 2 1. دانشگاه رازی. Write a Review. Overview; Reviews. Iran web rank: 42. Asia web rank: 806. Global web rank: 2619. General Information. Type: Public. Year of Establishment: 1972.". On the right side of the search results, there is a map of Razi University in Kermanshah, Iran, with a "See photos" button. Below the map is a card for "Razi University" with a star icon, a "Public university in Kermanshah, Iran" label, and buttons for "Website" and "Directions". The card also contains the following information: "Razi University is a public university based in Kermanshah, Iran. It is a center of research in many STEM fields such as CFD, membrane research, nano-science, and nanotechnology. Wikipedia", "Address: Kermanshah Province, Kermanshah, Sayyad-e-Shirazi Blvd, Iran", "President: Mohammad Ebrahim Aalami Aleagha", "Phone: +98 83 3427 7603", "Total enrollment: 8,902 (2010)", and "Founded: 1972".

Google's 'Pagerank' Algorithm

Algorithm to rank the hits so that the most useful ones come first

Google also takes your profile, interests, and prior searches into account

Neural-Network Pattern Recognition

Train the system using known patterns, then use it on others
(4-minute video: <http://www.youtube.com/watch?v=kGv-1it8Sac>)

Facial-Recognition Technology

Train the system using known patterns, then use it on others
(1-minute video: <http://www.youtube.com/watch?v=tZzIH4Qf5Y8>)

Conclusions and Future Work

Done so far: Formulated problems from computing and other engineering/tech disciplines in terms of puzzles

Forecasting and recommender systems discussed

3D models from 2D images

Computational geometry

Maps and graphs

Other problems: The world of puzzles is quite rich and extensive and we can find a puzzle for virtually any problem

People in various disciplines should pitch in

Book project: I am compiling the problems for my two seminars (ECE 1B and INT 94TN) into book form

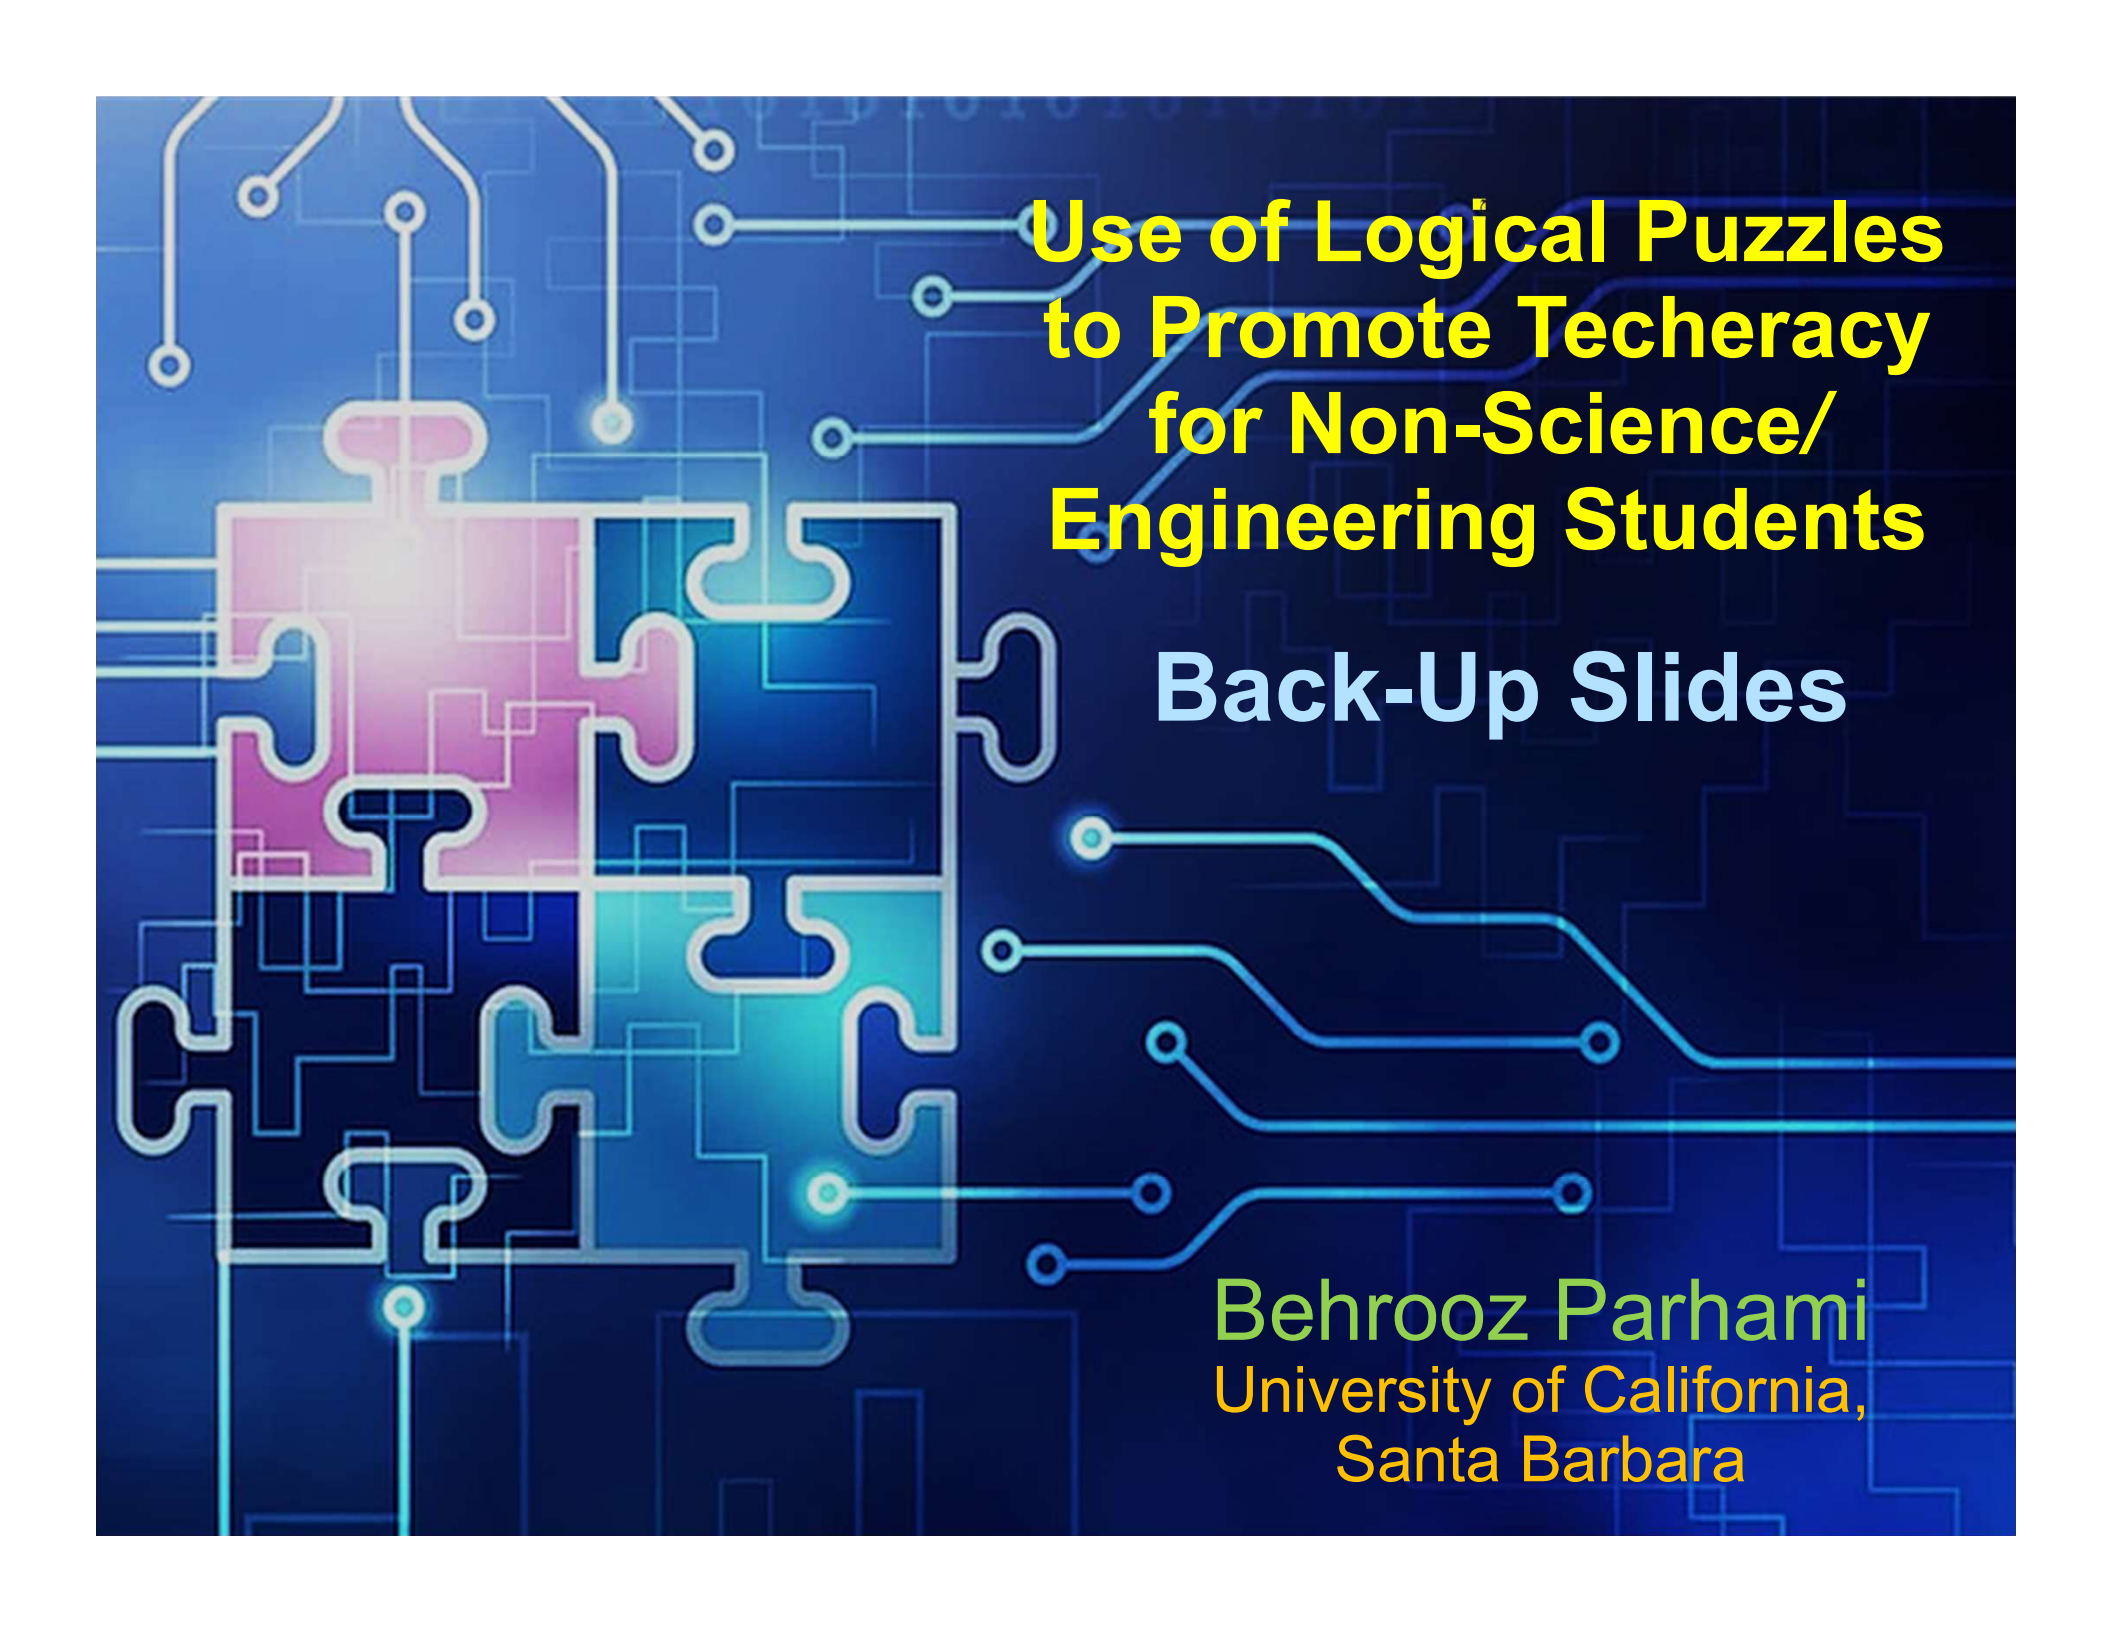

Hope to spread the message further via the book

Back-Up Slides

Behrooz Parhami
University of California,
Santa Barbara

Example Topic: Maps and Graphs

The Map Coloring Problem: USA

We want to color countries, oceans, lakes, and islands on a map so that no two adjacent areas have the same color.

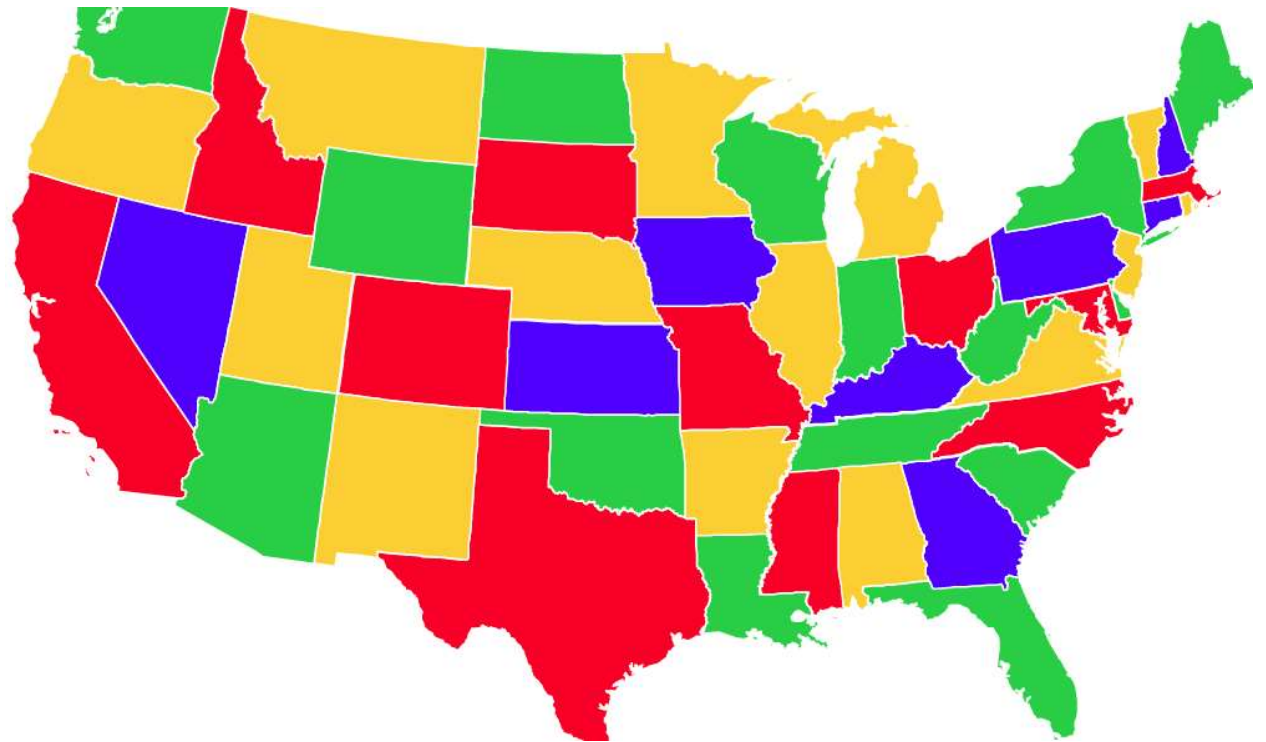

Two colors

Three colors

Four colors

We know that four colors always suffice

The Map Coloring Problem: Iran

We want to color countries, oceans, lakes, and islands on a map so that no two adjacent areas have the same color.

Two colors

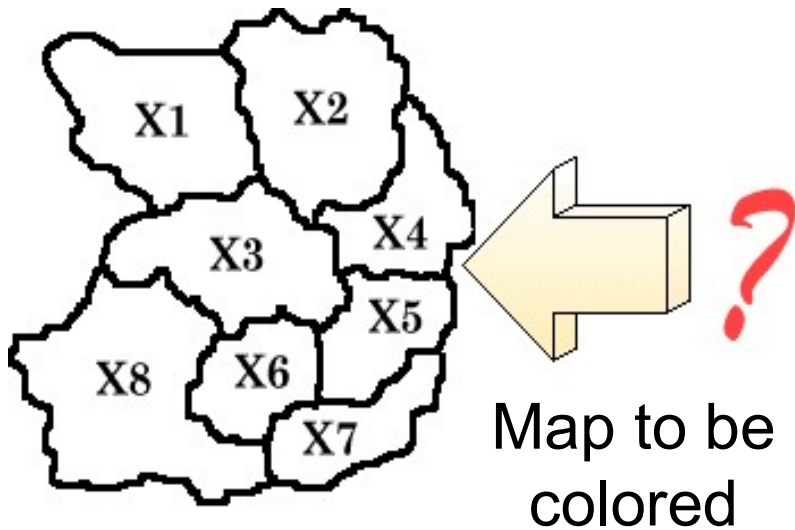

Three colors

Four colors

Map and Graph Coloring

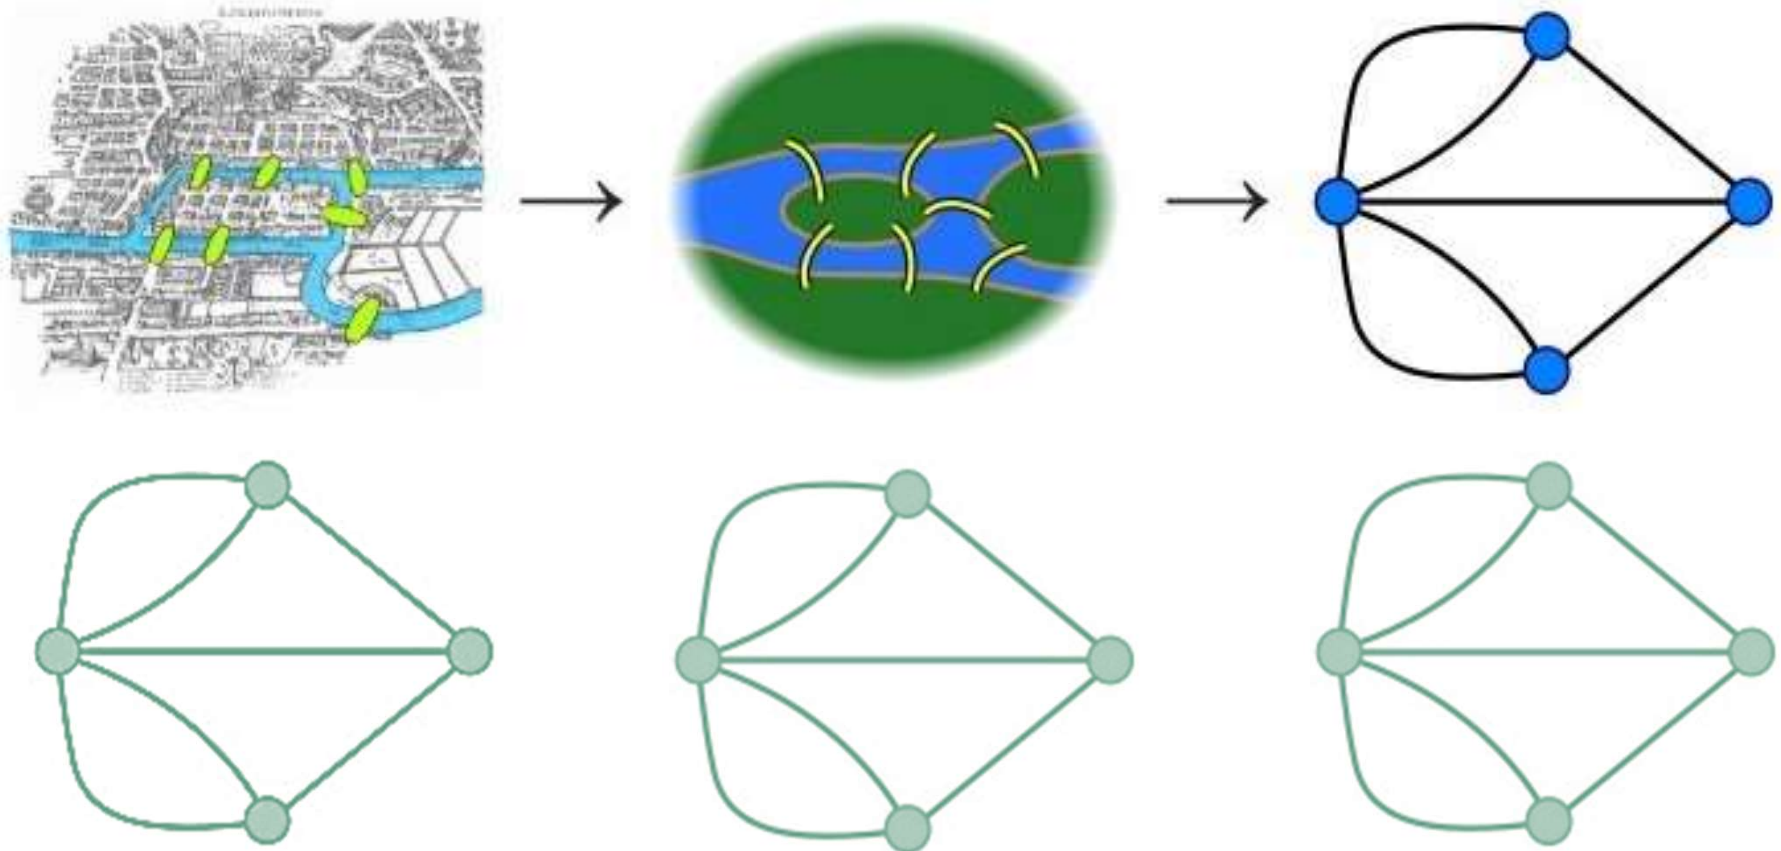

A map can be converted to a planar graph that can be drawn with no edges crossing

The Bridges of Königsberg Puzzle

Can you walk in the city of Königsberg in such a way that you cross each bridge once and only once (in either direction)?

Mazes Represented as Graphs

Maze-Solving Robots

4-minute video: <http://www.youtube.com/watch?v=MLHeUEPLSAY>

Applications of Graph Coloring

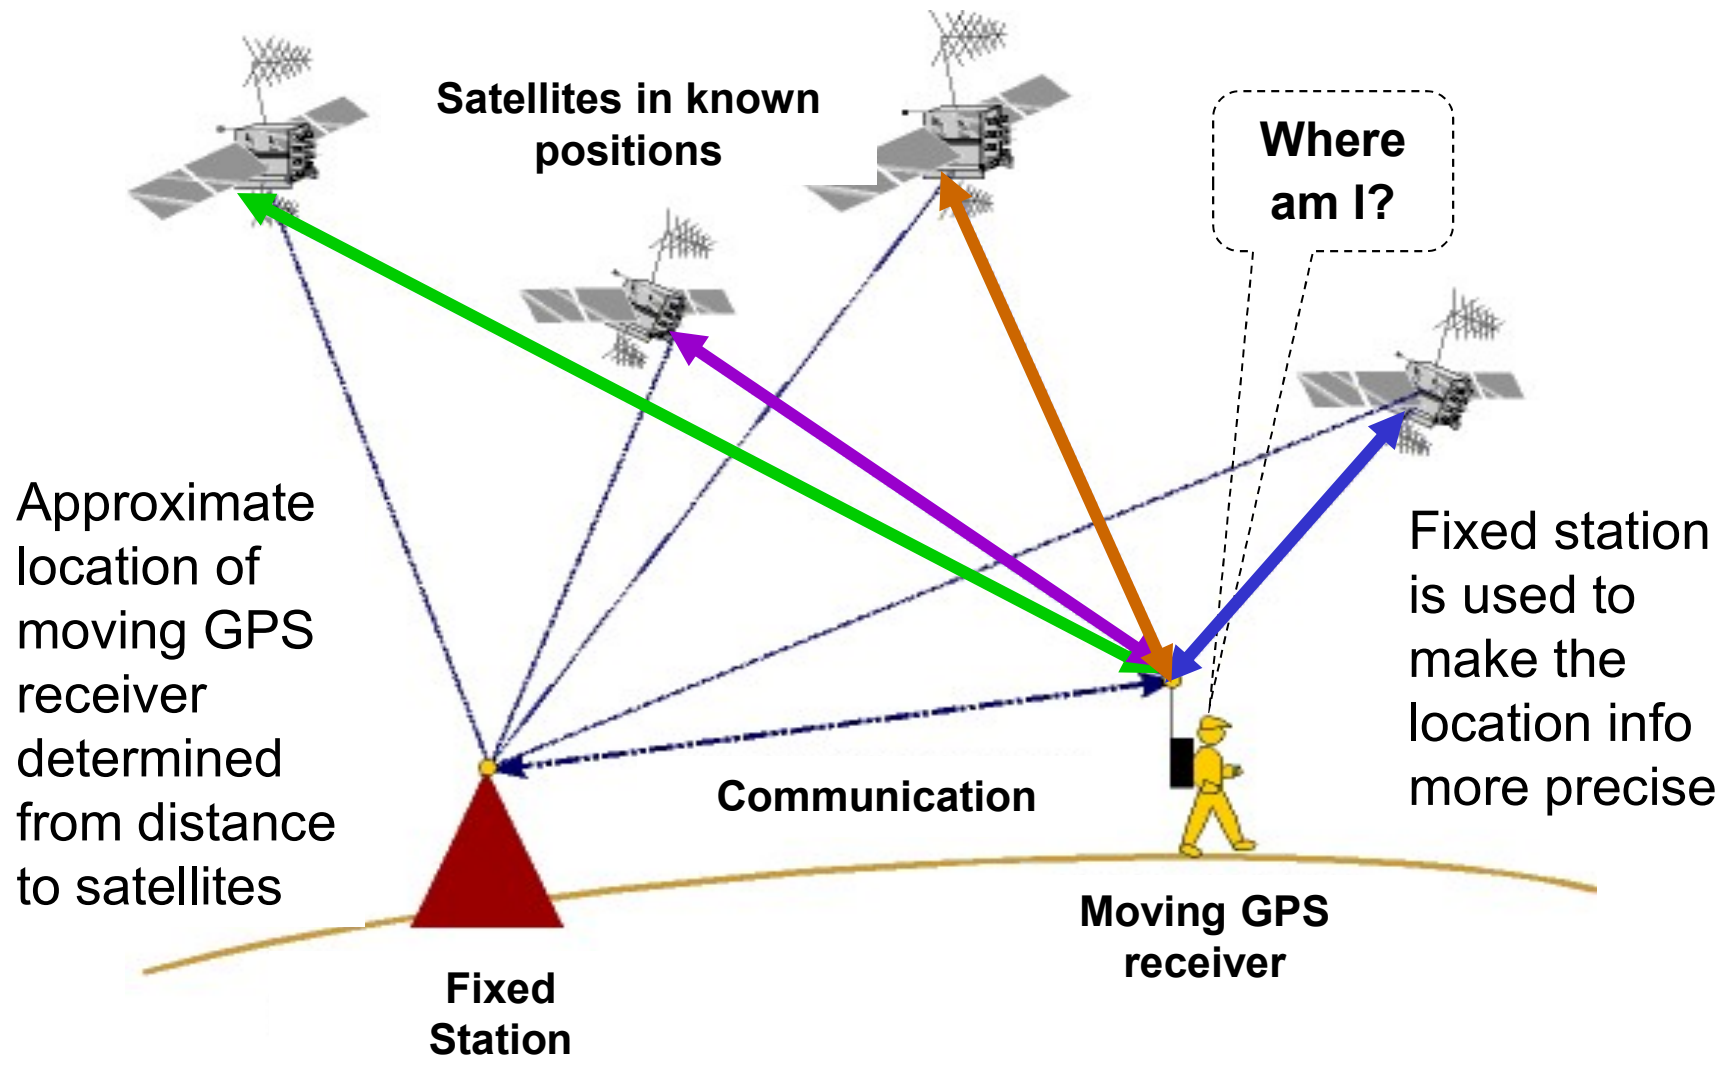

9-minute video: <http://www.youtube.com/watch?v=y4RAYQjKb5Y>

Solving Sudoku Puzzles

- Fill in the blank cells so that each row, column and 2x2 box has the characters 1 to 4 exactly once.

How GPS Works: The Measurements

GPS-Guided Navigation

You know where you are (GPS) and where you want to go (address)
Roads form a known maze, stored on Google's servers
When there are multiple paths, you want the shortest/fastest path
To determine which path is faster, dynamic congestion data may be used
