Capstone Electrical Engineering Design Projects

Electrical and Computer Engineering Department University of California, Santa Barbara

Class Meeting Time:

Time:	Mon/Wed 2:00-2:50pm
Place:	PHELPS 1431
Instructor:	Dr. Ilan Ben-Yaacov, ESB room 2213, ext 5295, ilan@engineering.ucsb.edu
Office Hours:	Mon 9:50-11:50am in ESB room 2213 or by appointment

Course Description and Objectives:

In this course, students work in teams under the direction of a faculty advisor to tackle a challenging engineering design project. Engineering communication, such as reports and oral presentations are covered. The course emphasizes practical, hands-on experience, and integrates analytical and design skills. Students will develop skills in design problem solving, creative thinking, project planning, and teamwork, as well as developing technical and practical skills in the particular area(s) of research covered by their project.

Topics Covered:

- Development of a Project Plan: Gantt Charts
- Development of Concepts and Designs
- Design Research and Development
- Prototyping
- Design Testing, Analysis, and Evaluation
- Engineering Reporting: Design Reviews, Presentations, and Technical Reports
- Engineering Project Management
- Intellectual Property and Lab Notebooks

Course Format:

In ECE 188, students design, build, and present a challenging engineering design project. ECE 188A primarily focuses on the initial design and development stage. After choosing a project, each group will begin researching the critical elements of their project, develop a preliminary project plan with a set of preliminary design specifications, and give a short preliminary presentation to the class describing their projects. Students then continue to refine their plan and begin prototyping and design testing. At the end of the quarter, each group will finalize their project plan and product design specifications, and give a 30 minute presentation detailing the (1) Project Plan, (2) Product Design Specifications, (3) Budget, (4) Prototyping and Testing, and (5) Division of Labor (individual responsibilities). Grades will be assigned approximately as follows:

- <u>Project Plan / Design Specifications</u>: 25% of Fall grade
- <u>Prototyping and Testing</u>: 15% of Fall grade
- <u>Final Presentations</u>: 40% of Fall grade
- Lab Notebook: 10% of Fall grade
- <u>Individual Contribution</u>: 10% of Fall grade

DAY / DATE	TOPIC / ACTIVITY	TASK / ASSIGNMENT
Week 1		
Mon 9/30	Project Introductions	Review projects
Wed 10/2	Project Requests, TMP	Form teams
Week 2		
Wed 10/9	Course Objectives Lab notebooks, Redmine	Projects/teams finalized
Week 3		
Wed 10/16	Project Planning: Gantt Charts Design Requirements/Specifications	Begin establishing design and specs
Week 4		
Wed 10/23	Prototyping	Group meetings with instructor and
	Prelim Project Plan / Design Specs	faculty advisers
Week 5		
Wed 10/30	Final Presentation Overview	Group meetings with instructor and faculty advisers
Week 6		
Wed 11/6	Corporate project design,	
	development, and management.	
Week 7		
		Preliminary Project Plan and
Wed 11/13	Preliminary Presentations	Preliminary Design Specs
		due Nov 16 by 5:00pm
Week 8		
Wed 11/20	No class (Thanksgiving week)	
Week 9		
Wed 11/27	Patents and Intellectual Property	
Week 10		
Wed 12/4	Project Presentations	Revised Project Plan, Design Specs
	Additional days/times TBD	Notebooks, and Group/Individual
	(if necessary)	Evaluations due Dec 9 by 5:00pm
