2026 UCSB RoboRacer Competition

Monday, June 1, 2026, 12-1:30pm

Engineering Sciences Building Room 1001

Three teams of EE undergraduates have spent their senior year designing and building 1/10th scale Formula 1 RoboRacer vehicles that can navigate and race around a track autonomously. On June 1, their vehicles will go head to head against one another, running time trials on 3 tracks that will be set up inside of ESB 1001 in our second annual **UCSB RoboRacer Competition**. We invite you to come watch the teams compete and learn all about autonomous driving and racing technology at this exciting event!

EE Capstone Instructor:
Ilan Ben-Yaacov

RoboRacer Mentors:
Joao Hespanha, Chris Cheney, Aaditya Prakash Kattokola
